Annual BizAv Safety Conference 2018

EBAA's BizAv Safety Conference has established itself as Europe's premier event dealing with all of the critical elements related to safety management, including data analysis and performance review.

Aviation professionals from across Europe and beyond will come together on the 29th & 30th November to learn best practices, discuss and analyze case studies, discover the latest technology and upscale their safety expertise and excellence.

The EBAA BizAv Safety Conference 2018 will not only focus on how to set individual Safety Performance Indicators (SPI) alerts and target performance markers based on safety metric principles but also provide the opportunity to attend presentations and panels on topics related to the integration of new technologies and the use of optional equipment in poor visibility conditions, including measuring safety and improvement on performance.

Venue Cologne Marriott Hotel
